

Context

Work in a new context - solve visual distraction and bad lighting in open offices.

Context is a desk divider for use in open offices to increase productivity by blocking visual distraction and unwanted lighting. Work collaboratively in the outside context on top of the flat divider or pop up your Context and increase focus in the inner context.

Why is it shaped like that?
Version 1 takes its form from the best of a test of hundreds of options for superior view blocking.
Version 2 responded to user evaluations for ease of use.

Order Version 2 now for \$55. Start working in a new context.
